# SQL Workshop Initialization 🚀

Before diving into SQL exercises, make sure you've got a solid connection with your database.

Verify you have schemas on the left, especially the `world` schema.

If it's not there, troubleshoot two potential issues:

1. Confirm you've got an establish database connection. (Refer to `HOW TO - Install MySQL 8.0+`)
2. During MySQL installation, double-check that you added `Samples and Examples` in the setup phase.

If you for some reason could not setup `Samples and Examples` during installation.
Refer to SQL-script in `03_world_database_backup.zip`

Open SQL file in MySQL Workbench

1. Open MySQL Workbench.
2. Open a MySQL Connection to MySQL Server.
3. In menu bar select File -> Open SQL Script...
    - or Click

    - or `CTRL+SHIFT+O` as a shortcut on windows.
4. Browse for you exercise file.
5. Dive into the exercises.

Happy querying! 🚀
